Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/736,333

Applicant(s)

PANDITHARADHYA ET AL.

Examiner

Cong-Lac Huynh

Art Unit

2178

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 3/18/04.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. This action is responsive to communications: the application filed on 12/15/03, and the IDSs filed on 3/18/04.
2. Claims 1-20 are pending in the case. Claims 1, 5, and 13 are independent claims.

Claim Rejections - 35 USC § 101

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 5-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 5-12 are directed to an editor for defining an XML schema. Said editor is not a statutory subject matter since it does not fall within the statutory subject matter as above. The editor as claimed is merely a combination of views related to an XML schema where said combination is non-functional descriptive material. See MPEP 2106.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-2, 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Olsen (US Pat App Pub No 2004/014862, 7/29/04, filed 1/27/03) in view of Hohmann et al. (US Pat App Pub No 2005/0256965, 11/17/05, priority 4/7/00).

Regarding independent claim 1, Olsen discloses:

- including nodes within said XML schema to define characteristics of the non-XML data stream (figures 2B, 5A-B, [0025], [0026])

Olsen does not disclose:

- receiving said non-XML data stream
- parsing said non-XML data in accordance with information contained in said nodes
- creating said XML instance containing said input data

Hohmann discloses:

- receiving said non-XML data stream ([0295]: receiving non-XML document)
- parsing said non-XML data in accordance with information contained in said nodes ([0295], figure 16)
- creating said XML instance containing said input data ([0295])

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to have combined Hohmann into Olsen since Hohmann discloses generating a XML instance via a XML data from a non-XML data providing the advantage to incorporate into the XML schema for the input data in Olsen for obtaining a XML instance for some input data according to a XML schema.

Regarding claim 2, which is dependent on claim 1, Olsen discloses defining, in said XML schema, delimiters, TagNames, positional information within said non-XML data stream (figures 2B, 5A-B).

Regarding claim 4, which is dependent on claim 1, Olsen discloses that the non-XMLdata comprises at least one of flat files, EDI files, and COBOL files (figures 2B, 5A-B).

7. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Olsen in view of Hohmann as applied to claim 1 above, and further in view of Fuh et al. (US Pat App Pub No 2004/0073870, 4/15/04, priority 10/15/02).

Regarding claim 3, which is dependent on claim 1, Olsen and Hohmann does not disclose annotating said XMLschema with said nodes in accordance with standard conventions applicable to an XSD schema.

Fuh discloses annotating the XMLschema with said nodes in accordance with standard conventions applicable to an XSD schema (figures 3-4, [0007], [0026], [0029]-[0030], [0036]).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to have combined Fuh into Hohmann and Olsen for the following reason.

Fuh discloses annotating the XML schema with nodes in accordance to an XSD

schema providing the advantage to include in the XML schema in Hohmann and Olsen for offering an easy understanding of a XML schema via annotations.

8. Claims 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fuh et al. (US Pat App Pub No 2004/0073870, 4/15/04, priority 10/15/02).

Regarding independent claim 13, Fuh discloses:

- providing assemblies containing implementation to extend a functionality of a schema compiler ([0029], [0035]: providing the Annotated Automation Encoding format with the addition of annotations, which is attributes for element nodes in the XML schema tree shows assemblies with implementation to extend a functionality of the XML schema compiler)
- referencing definitions of interfaces for exposing extended functionalities to said schema editor (figures 3, 5)

Fuh does not explicitly disclose the schema editor. However, Fuh does teach the XML schema compiler which receives XML schema definition as input and generates a structured hierarchy for the XML schema definition and represents it in an annotated tree ([0034]-[0036]).

It would have been obvious to one of ordinary skill in the art at the time of the invention was made to have modified Fuh to include a schema editor since the feature in Fuh implies that the schema is added with annotations, and thus modified. This suggests that the XML schema compiler further has a role of an editor.

Art Unit: 2178

Regarding claim 14, which is dependent on claim 13, Fuh discloses that said extended functionalities include additional properties added to elements and attributes of an XML schema ([0029], figures 3, 5: additional attributes via annotations in the XML schema tree shows additional properties added to elements of an XML schema).

Regarding claim 15, which is dependent on claim 14, Fuh discloses providing a property manager that implements an interface to define custom properties for said elements and attributes ([0035]: defining attributes of the element nodes where the attributes are considered custom properties implies that there is a properties manager for performing said function).

Regarding claim 16, which is dependent on claim 15, Fuh discloses storing said custom properties within said XML schema (figure 3, #308).

Regarding claim 17, which is dependent on claim 15, Fuh discloses annotating said XML schema to describe non-XML data streams (figure 3, [0040], [0041]).

Regarding claim 18, which is dependent on claim 15, Fuh discloses providing a validator to validate said custom properties ([0047], [0048][0064], [0071], [0072]).

Regarding claim 19, which is dependent on claim 15, Fuh discloses providing an instance generator for generating an instance of said XML schema (figure 5).

Regarding claim 20, which is dependent on claim 13, Fuh discloses annotating a schema being edited by said schema editor to include information about said extended functionalities ([0033]-[0035]: annotations for XML schema shows annotating a schema which is edited to include attributes of sub-elements, which are considered information about extended functionalities).

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Vincent, III (US Pat App Pub No 2004/0268240, 12/30/04, priority 6/11/03).

Brandt et al. (US Pat App Pub No 2004/0153171, 8/5/04, priority 10/21/02).
